

LED INFINITY MIRROR

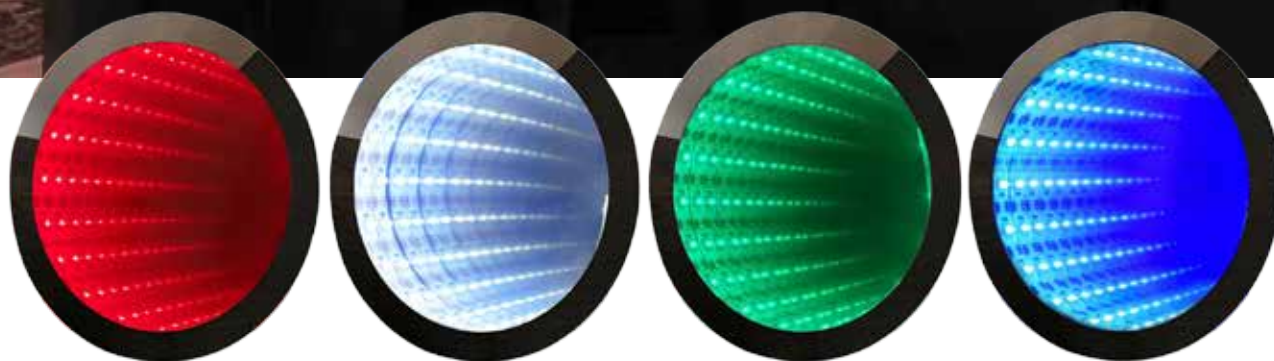

Bathrooms are characterized, in general, as more restricted areas - they are not always the big, when it comes to lighting the interiors of your home, you cannot afford to ignore your bathroom. It is important to choose appropriate bathroom lighting that would not only provide illumination but also go with decorate of your bathroom. Bathroom lighting is a part of the broader category of home lighting. Using infinity mirror in your bathroom and you will feel the lights appear to recede into infinity, thereby creating the appearance of a tunnel of lights of great depth, create a sense of space expansion.

Bring a Sense of Freshness to Your Vision

Inspired by infinity mirrors from the 1970s, the lights up to reveal a seemingly endless line of reflections, appear smaller and smaller as they fade into the distance. When you turn it off, it becomes an elegant everyday mirror, and installed in the wall in a low profile. Once you turn it on, it's as if a portal has been opened leading you into another dimension and bring a sense of freshness to your vision.

Liteharbor Infinity Mirror is a spectacular showcase of artistry.
